

Policy on LPC support for Oxford/Cambridge and ED/EA applications to the US

Application to Oxford and Cambridge universities is an intensely competitive process. Therefore with a view of giving students a fair chance in this competition and our wish to sincerely help every student to find the appropriate university-fit, LPC will support only those student who meet the published entrance requirements as stated on the University websites.

The applications are made with the end of year achievement grades from the 1st year as the published reporting schedule of the college does not warrant any possible changes to these grades. Teachers are not expected to make any additional predictions before the reporting deadline. The predictions for the core points will be based on the submission of the Extended Essay and the Theory of Knowledge Essay. However, the submission may not guarantee the required points needed to meet the entrance requirements. Hence all entrance requirements must be met out of 42.

The entrance requirements for relevant courses can be found on the individual course listing pages on the university websites:

Oxford University: <http://www.ox.ac.uk/admissions/undergraduate/courses-listing>.

Cambridge University: <http://www.study.cam.ac.uk/undergraduate/courses/>

For all early decisions (which are binding) and early action applications to the US universities, students will similarly need to meet the expected IB grade ranges based on the acceptances from the university data base of the college.

For any related questions regarding university requirements or application process please do not hesitate to communicate with our Universities Guidance Counsellor, Kalpana Balan-Seitz at Kalpana@lpcuwc.edu.hk
